

Best Water Solutions

MV Group is an Italian company founded in 2012 but with twenty years experience in the world of filtration, civil/industrial water treatment, mechanical engineering and plastic mouldings.

We develop our products entirely within the company, to achieve the best balance between innovation, functionality, ease of use and Italian design, using the best quality components and their assembly.

All our products are made in Italy with Italian or European materials.

ECO 2P

Two-piece filter housing

ECO 2P housings are all dedicated to **cold water** for residential and commercial applications. They are compatible with a broad range of cartridges widely available on the market.

Filter housings consist of a body and head with in/out connections: 1/2", 3/4" and 1" brass threads insert and two O-rings. Heads are equipped with a **pressure relief valve**, providing ability to release air pressure collected during cartridge replacement procedure.

Available in: single, duplex and triplex.

*ECO 2P series are equipped with **centralizing ring for cartridges**. The ring keeps your cartridge centered and allows you easy and fast replacement procedure.*

ECO 2P and 3P ensures maximum leak proof performance and ease of cartridge replacement

ECO 3P

Three-piece filter housing

ECO 3P housings for filtration and water treatment are suitable for various configurations of cartridges. They are all dedicated to **cold water** on residential and commercial applications.

Filter housings consist of a body, ring and head with in/out connections: 1/2", 3/4" and 1" brass threads insert and two O-rings. Heads are equipped with a **pressure relief valve**, providing ability to release air pressure collected during cartridge replacement procedure.

Available in: single, duplex and triplex.

FILTER HOUSINGS

Filter housings are available in a wide range of sizes and materials to cover for various application requirements of flow, temperature and cartridge type.

MV 8.3

Housings with brass head and PET-G bowl are ideal for large-scale applications, both commercial and industrial.

Housing with brass head and stainless steel bodies are suitable for the most demanding applications such as high pressure, high temperatures or corrosive, harsh conditions.

The housings are capable of temperatures up to 90°C

MV LINE 301

AN INNOVATIVE AND TECHNOLOGICAL LINE

CARTRIDGES

A wide range of filter cartridges for mechanical filtration and water treatment. All our cartridges are suitable to major standard housings.

SEDIMENT FILTRATION

Our line of filter cartridges for sediment removal is highly effective in getting rid of dirt, rust, sand, silt, algae and fine particles from water. Both washable and disposable cartridges are available, we offer a wide range of sizes with heights from 5" to 40" and various filtering media.

WATER TREATMENT

Our cartridges for water treatment offer an extensive range of treating media. They are perfect for numerous applications, for both civil and industrial use. It's an ideal method to improve the quality of your water.
